Feasibility Studies
Code Review and Analysis
Facility Analysis and Documentation
Development Advisory Services

Why We Are Better

At Horizon Architecture, we believe there is a better way. Every project begins with a blank sheet of paper and an idea. Our process is an ongoing conversation amongst a collaborative team with a common objective—to create your ideal solution. Through this simple but powerful philosophy, we foster your architecture project, be it a study or a full blown building, from idea to reality.

As an Air Force veteran and fighter pilot, Michael leverages his leadership skills to foster an environment of collaborative teamwork to successfully execute projects for our clients. Communication is key to our project success—put Horizon to work for you!
